## PROFESSIONAL SUMMARY

FinTech graduate and MBA candidate at Creighton University with hands-on experience building AI-powered applications that solve practical business problems. Skilled in Python, Streamlit, API integration, business research, and translating user needs into functional software tools. Current Creighton baseball student-athlete known for discipline, collaboration, and a strong interest in AI solutions engineering, technical product management, and business-focused software development.

## EDUCATION

- Creighton University — B.S., FinTech; Omaha, Nebraska; Aug 2021–May 2025; GPA: 3.45; Relevant coursework: Python, SQL, Machine Learning, Web Application.
- Creighton University — MBA Candidate, Business Administration; Omaha, Nebraska; Aug 2025–May 2027; GPA: 4.0; Relevant coursework: Leadership, Ethics, Advanced Economics, Cybersecurity.

## PROJECTS

- POS Sales agent — <https://github.com/tategillen20-pixel/restaurant-prospecting-agent>. Generates potential POS sales prospects and automates restaurant research for sales teams; developed a Python-based agent and implemented core logic and data flows to produce structured prospect lists for downstream use; provides potential clients for POS salesmen in a selected city. Technologies: Python, LLMs, prompt engineering, Streamlit.
- SEO Agent — <https://github.com/tategillen20-pixel/seo-agent>. Automates SEO tasks and generates ranking-related recommendations for businesses' Google Profiles; built an agent integrating with Google Profiles and implemented data integration and automation components using prompt engineering; improves a business's rankings for specified target keywords. Technologies: prompt engineering, LLMs.
- n8n email automation — Implements n8n workflows to compile city-specific lists of potential POS clients and automatically email them to sales representatives; integrated data-extraction steps and scheduled automated delivery; delivers a list of potential clients every Monday at 8:15am. Technologies: n8n.
- Missiongraph — Aggregates and models public federal contracting data for analysis and discovery; built an application that ingests USAspending and SAM.gov data, modeled agencies, contractors, opportunities, and technical capabilities in a knowledge graph, and implemented data-extraction and entity-linking pipelines. Technologies: knowledge graph, entity-linking, data-extraction.
- Five Elms Target Scanner — <https://github.com/tategillen20-pixel/five-elms-target-scanner>. Evaluates B2B SaaS companies for investment research; built an AI-powered investment research tool and implemented data-aggregation and analysis modules using LLMs and Python; provides information and a ranking of which companies fit a user's mission best. Technologies: Python, LLMs, data aggregation.

## LEADERSHIP

- Creighton Baseball — Member; Aug 2021–May 2027; 2025 Big East Regular Season and Tournament Champions; All-Tournament Team; developed leadership, teamwork, time management, communication, and resilience.

## SKILLS

- Python; LLMs; prompt engineering; OpenAI; Claude; Streamlit; Git; n8n; VSCode; API keys.
